SRIT Contracted Specialized Studios (CSU)

CSU leverages a unique and effective methodology built on specialized "Studios". These studios represent core areas of expertise. This unique structure allows us to assemble cross-functional teams with the perfect blend of expertise to tackle your specific challenges and deliver innovative solutions tailored to your business needs.

Experience Design Studio

Masters of user-centric design, crafting intuitive and engaging user experiences.

User/Product Research, App Architecture & Design (Web, Mobile, Wearables), Accessibility.
Branding & VFX/AR/VR, 3D...

Workforce Engagement Studio

Skilled developers specializing in crafting the best flows and business processes for SaaS Applications
Oracle Fusion Cloud, SAP, Salesforce, ServiceNow, Workday, Zoho...

Data Centric Studio

We specialize in empowering you to unlock valuable insights hidden within your data, driving informed decision-making.

Data Engg, Data Science, BI, Big Data, Integration (App, Data, Business Process)...

Cloud Native Studio

Experts in building scalable and secure cloud-based applications/solutions.

AWS, Azure, GCP clouds
Java, .Net, Angular, React, NodeJS, Python...

Web3 Development Studio

Pioneers at the forefront of Web3 technologies, building the future of decentralized applications.

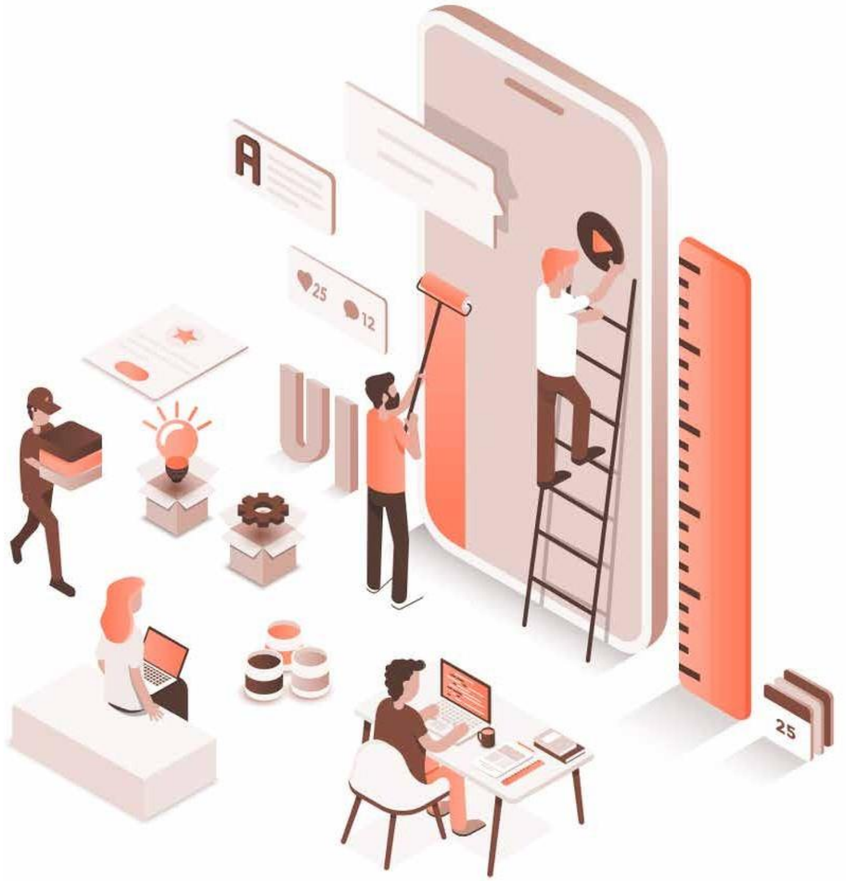
Blockchain, AI/ML, IoT...

Experience Design Studio

This Studio is dedicated to creating user-centric designs that provide intuitive and engaging user experiences. We specialize in User and Product Research, delving into user behaviors and needs to inform design strategies.

Our expertise includes App Architecture & Design for Web, Mobile, and Wearable platforms, ensuring accessibility for all users. We also excel in Branding, VFX, AR/VR, and 3D design, blending aesthetics with functionality to create immersive digital environments.

Our team leverages the latest design tools and methodologies to deliver innovative solutions that resonate with users and drive business success. At this Studio, we transform ideas into visually compelling and highly functional digital experiences that captivate and delight users.



Notable Projects

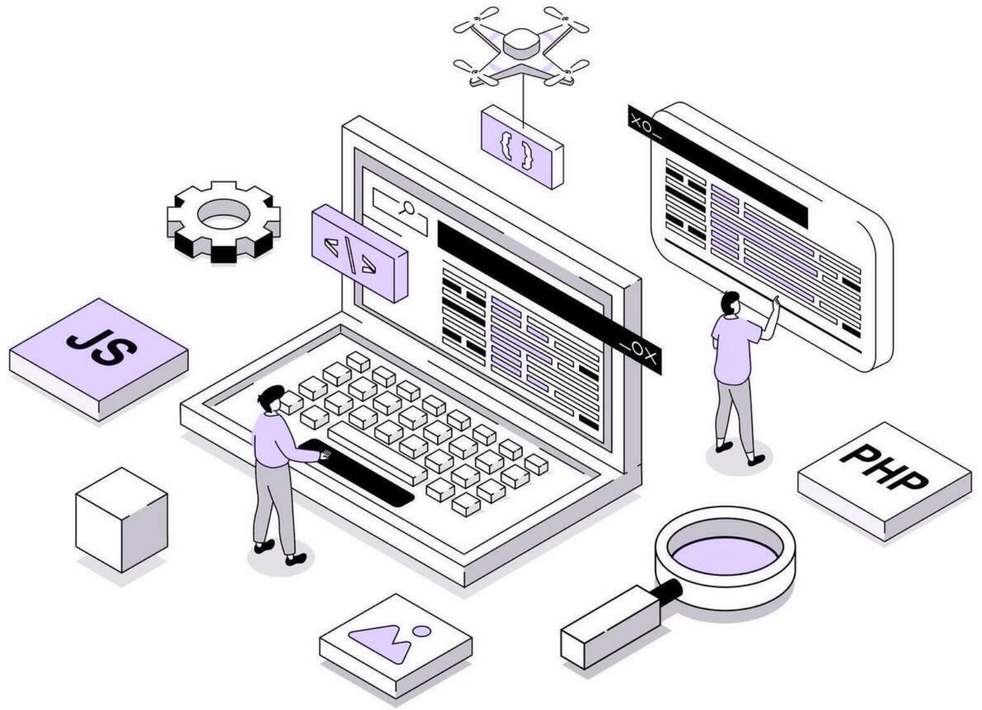
Fintech Application: Crafted an advanced fintech application experience that enables secure P2P and merchant payments using facial recognition technology. This project focused on creating a highly secure system that prevents bypassing and data breaches, providing users with a seamless and safe payment experience.

Professional Platform: Created a comprehensive platform allowing users to share their professional profiles, portfolios, contact details, and social accounts. This platform includes robust features for managing who has access to their information, enhancing privacy and control for users while showcasing their professional presence.

Cloud Native Applications Studio

This Studio develops scalable, secure cloud-native applications tailored to meet specific business needs. We harness the full potential of cloud platforms like AWS, Azure, and Google Cloud, ensuring high performance and availability. Our approach covers strategy, architecture, implementation, and optimization, providing robust security features and seamless integration with existing systems.

By utilizing advanced technologies and best practices, we enable our clients to achieve agility, innovation, and a competitive edge in the digital landscape. This Studio is committed to transforming your vision into reality, ensuring a smooth and successful digitalisation journey.



Notable Projects

Integrated Fintech Solution: Developed a sophisticated fintech application that combines multiple services, including bank aggregation, micro-lending partner integration, and utility subscription management. The app automates payments for subscriptions and utility bills, collecting funds from users later, thus simplifying financial management and enhancing user convenience.

Influencer Marketing Platform: Created a platform that enables a central body to connect social media influencers with brands, facilitating the management and tracking of social media brand campaigns and analytics. This platform streamlines campaign coordination, enhances engagement metrics, and provides comprehensive analytics to measure campaign effectiveness.

Workforce Engagement Studio

This Studio is dedicated to enhancing workforce productivity through the development of superior SaaS applications. Our skilled developers are experts in crafting efficient workflows and business processes that align with organizational goals.

We focus on delivering user-friendly solutions that facilitate seamless communication, collaboration, and management within the workforce. By leveraging modern development frameworks and tools, we ensure that our applications are not only functional but also intuitive and scalable.

Our commitment to innovation and excellence drives us to continuously improve and adapt our solutions to meet evolving business needs. At this Studio, we are passionate about creating tools that empower your workforce, making them more engaged, productive, and satisfied.

Notable Projects

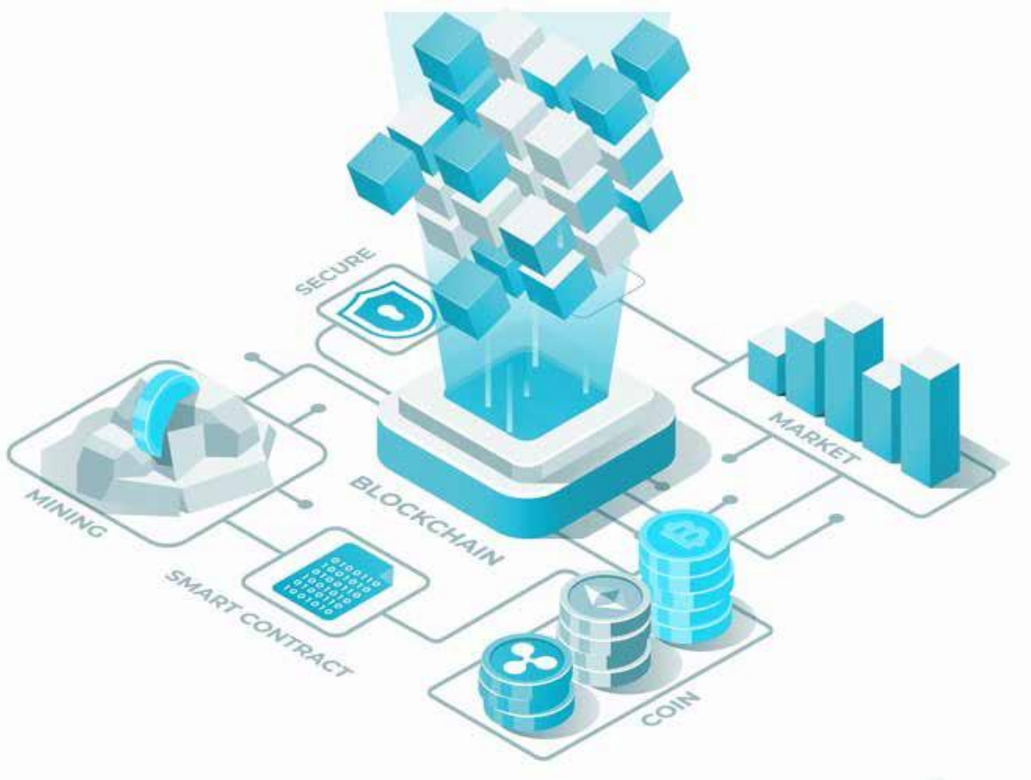
Workforce Engagement Application: Developed an in-house product designed to provide a unified communication platform for workforces. This platform aids in collaborative problem-solving, includes appreciation features to offer recognition and motivation, and enables tracking and monitoring of employee performance and mental well-being. This comprehensive solution enhances employee engagement and productivity, fostering a more connected and motivated workforce.

Web3 Studio

This Studio stands at the cutting edge of Web3 and AI/ML technologies, driving the future of decentralized applications and intelligent systems. Our expertise includes developing blockchain solutions, such as smart contracts, dApps, and decentralized finance (DeFi), to create secure, transparent, and efficient applications.

Additionally, we harness the power of Artificial Intelligence and Machine Learning to develop advanced analytics, predictive models, and intelligent automation solutions. Our team stays ahead of industry trends, ensuring that our clients benefit from the latest advancements in both blockchain and AI/ML technologies.

Whether it's building new financial systems, creating decentralized marketplaces, or implementing intelligent data processing systems, this Studio is your partner in navigating and leveraging these transformative technologies to drive innovation and business success.



Notable Projects

Trade-Based Money Laundering Detection: Utilized AI and ML to develop a robust system for detecting and preventing trade-based money laundering. This project involved creating advanced algorithms and models to identify suspicious trade activities, ensuring compliance and security for financial institutions and businesses

IDD Identification and Therapy Recommendation Platform: Created an innovative solution for identifying intellectual and developmental disabilities (IDD) and predicting suitable therapies. This platform uses AI and ML to analyze data and recommend personalized therapy plans, improving the quality of life for individuals with IDD and providing valuable insights for their guardians.

Data Centric Studio

This Studio transforms data into actionable insights, empowering businesses to make informed decisions.

Our services span Data Engineering, Data Science, Business Intelligence (BI), and Big Data, providing comprehensive solutions for data management and analysis. We specialize in data integration across applications, data systems, and business processes, ensuring seamless and accurate data flow.

Our team of experts employ advanced analytics and machine learning techniques to uncover hidden patterns and trends within your data, driving strategic business outcomes. We are committed to helping you harness the full potential of your data, from data warehousing and ETL processes to real-time analytics and predictive modeling. At this Studio, we transform data into a strategic asset, enabling you to stay ahead in a data-driven world.

Notable Projects

Data Warehousing and Real-Time Analytics Solution: Developed a comprehensive data warehousing solution coupled with real-time analytics capabilities. This project involved integrating multiple data sources, ensuring data accuracy and consistency, and providing real-time insights to support dynamic business decision-making.

Predictive Modeling for Business Insights: Implemented advanced machine learning techniques to build predictive models, uncovering hidden patterns and trends within large datasets. These models provide businesses with strategic insights, helping them make informed decisions and stay competitive in the market.

Service Offerings

Expert Implementation Services

Our skilled team will handle the implementation of your chosen technology solutions, ensuring a smooth and efficient process. We will work closely with you every step of the way, from project planning to deployment and ongoing support.

Vision & Road Map Development

We partner with you to craft a clear vision for your technology future and develop a detailed roadmap to get you there. Our roadmaps are actionable and take into account your budget, resources, and risk tolerance.

Strategic Technology Consulting

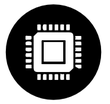
We provide strategic guidance to help you identify your technology needs and develop a roadmap for success. Our experienced consultants will work closely with you to understand your business goals and challenges, and recommend the best technology solutions to achieve your objectives.

Rigorous Quality Assurance

We are committed to delivering high-quality solutions that meet your needs. Our rigorous quality assurance processes ensure that your systems are reliable, scalable, and secure.

Managed Services for Peace of Mind

We offer a variety of managed services to help you keep your IT infrastructure running smoothly and efficiently. Our managed services team takes care of everything from day-to-day operations to ongoing maintenance and security updates.



DevOps for faster Delivery

We help you implement DevOps practices to streamline your software development process. DevOps helps you deliver software faster and more reliably, while also reducing costs
